

Solutions for CPA Firms

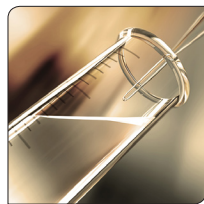

McGuire Sponsel partners with CPAs to enhance their client relationships through innovative tax and financing solutions. We are committed to our partners and clients and intently focused on their needs. Every engagement is methodically approached in order to apply proven specialized consulting solutions designed to bring identifiable, quantifiable and reliable value to clients.

“

Our track record of success and the testimonials of our clients speak to the dedication of our professionals and their commitment to delivering value to each client that we serve.

”

Research & Development Tax Credits

Both federal and state research and development tax credits reward companies based on their investment in developing new products and processes. Our professionals combine an understanding of tax law with engineering disciplines to conduct retroactive studies, current year engagements, and risk advisory services.

Cost Segregation

Cost segregation reclassifies assets to maximize personal property, optimizing depreciation deductions and resulting in substantial cash flow benefits. A successful cost segregation study requires an understanding of the complexities of the tax code and the materials and methods of construction design.

IC-DISC

An Interest Charge Domestic International Sales Corporation provides permanent tax savings opportunities for qualifying U.S. exporters. Many owner managed exporting businesses can realize substantial tax savings by forming an IC-DISC.

Financing & Economic Incentives

Our financing services can save your clients' money when entering into or terminating interest rate swaps with banks and negotiating a refinancing opportunity or new debt. We help negotiate economic incentives packages for companies that are creating new jobs, making investments in real estate, or purchasing equipment.

Nonprofit Advisory

McGuire Sponsel is registered with the SEC and MSRB as an Independent Registered Municipal Advisor. We serve the education, healthcare, senior living, non-profit and corporate sectors related to debt and derivative advisory services.
